

# Upcoming pump upgrade: Plainland Underpass

September 2022

## Project scope

The Department of Transport and Main Roads is planning to upgrade the **pedestrian underpass** underneath the **Warrego Highway at Plainland**.

This project involves replacing the existing pump, located in the underpass floor, with a larger dual system pump and a secondary back-up pump.

This will reduce the duration of closures due to flooding in wet weather events. This project is funded under the Queensland Government's maintenance program at a cost of \$100,000.

## Construction impacts

Works will be undertaken from **Monday 19 September 2022 to Friday 30 September 2022**, weather permitting.

The closure has been scheduled for the school holidays to reduce the impact on pedestrians. As there is no alternate pedestrian route to cross the Warrego Highway at Plainland, pedestrians will be required to seek an alternative travel method.

The works will be conducted between **6am and 6pm, Monday to Saturday**.

Nearby residents and businesses may experience temporary construction noise and dust while the works are underway.

The safety of pedestrians and bike riders is the department's top priority. We thank you for your patience and understanding during the delivery of these important works and apologise for any inconvenience they may cause.
